UPGRADE ALL SENSES

SENTIO BY HARVIA

Upgrade all senses

Sentio by Harvia means a top-level sauna experience for all senses. It is all about balance, and you are at the heart of it. You are the sum of your feelings.

The perfect sauna bathing experience has been created by combining the most extensive know-how of a Finnish sauna pioneer with all-in-one sauna technology. From the first moment on, Sentio by Harvia is pure pleasure.

Sentio by Harvia offers everything you need for your sauna experience. You do not have to worry about the planning, because we have already taken care of everything. It is time to sit back and enjoy yourself.

UPGRADE ALL SENSES

SENTIO BY HARVIA

ELECTRIC SAUNA HEATERS

SENTIO BY HARVIA

Pragmatic sauna heater design

The Sentio by Harvia sauna heaters represent the top level of design and technology. The simple and streamlined design of the Concept R sauna heaters comes with progressive features that take your sauna experience to the highest level.

Sentio by Harvia heat sources combine innovative and the world's most advanced sauna heater technology with globally award-winning design. High-quality materials: steel, wood and stone. Details that stimulate all the senses. Feel the water hiss on the sauna stones. Your favourite ethereal scent billowing in the air. The balance of body and mind. The warmth on your skin. Your wishes have come true.

LONG-LASTING

The grates above the heating elements provide protection against excess water.

SAFE

Thanks to its triple-wall technology, the outer wall temperature of the Concept R heater remains low.

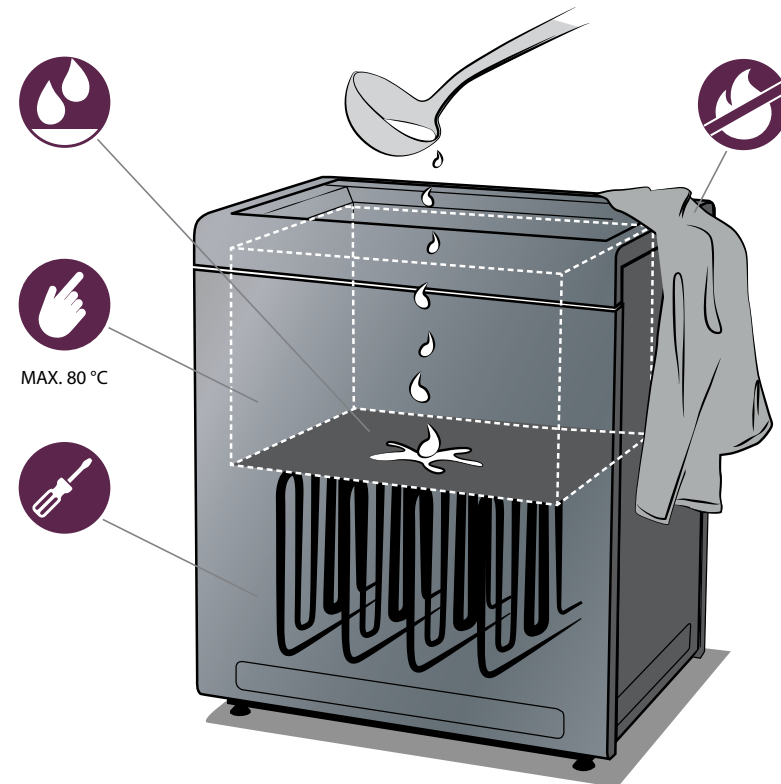

EASY TO MAINTAIN

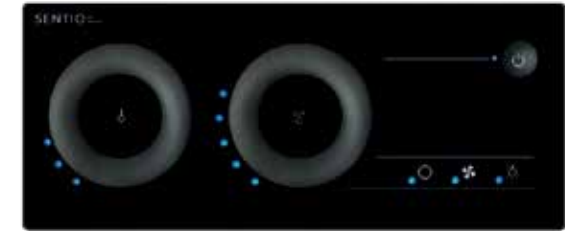

The sauna heater is easy to maintain. The stone space has been separated from the heating elements, so that the stones do not need to be removed during heating element maintenance.

AUTOMATIC SWITCH OFF (OPTION)

The integrated switch-off feature provides the best possible safety without compromises in the heater's appearance. The rocker switch, available as an accessory, turns off the sauna heater if something is placed over it (e.g. a towel).

reddot design award
winner 2013

CONCEPT R

The Concept R heater's progressive design and cutting-edge technology have been granted a Red Dot Award. The heater's triple-wall technology, integrated safety switch and amazing design, which allows for all of the heater's sides to remain visible in a sauna's interior design, have been especially praised.

CONCEPT R MINI COMBI

The advanced design of Concept R Mini Combi received the winning score from the 63 members of a jury consisting of design and technology experts. Special praise was given to Concept R Mini Combi's elegant leg, which contains the required technology, cables and connecting wires.

JUST SAUNA JA JUST SAUNA COMBI

On 28 February 2014 in Munich, Germany, the Just Sauna control unit won the jury votes in the Bathroom/Wellness category at the iF Product Design Award event.

Award-winning design

The design of our Concept R sauna heaters has received recognition at international design competitions from the field's experts. Smooth design that appeals to all senses is the starting point for all of Sentio by Harvia's products.

The iF DESIGN AWARD is one of the world's most prestigious design awards. This year, more than 6,400 products from 54 countries competed for the honour. Awards are granted in several categories annually: the product, package, communications, interior architecture, concepts, service design and architecture.

The Red Dot Award®, one of the biggest design competitions in the world, was first held in 1955. This coveted award is globally recognised as a sign of design quality that truly stands out.

ELECTRIC SAUNA HEATERS

SENTIO BY HARVIA

SENTIO^{BY}
HARVIA

Concept R

PRAGMATIC SAUNA HEATER DESIGN

Sentio by Harvia's Concept R is an award-winning design sauna heater suitable for a modern home spa. The wall design utilises top-level sauna technology, i.e. triple-wall technology, which allows the heater's outer wall temperature to remain low.

Sentio by Harvia's Concept R represents the highest level of design and technology. The smooth design of Concept R makes it easy to include this heater as part of any modern sauna room. Painted black and stylish from top to bottom, Concept R can be placed at the centre of the bench solution for the bathers to admire. As a finishing touch, a safety railing that fits seamlessly around the sauna heater has been created for Concept R.

Highly advanced technology enables quick heating and a long lifespan of the product. The stones and the heating elements are in their own separate compartments.

As an accessory, the Concept R sauna heaters are offered an integrated safety switch that provides the best possible safety without affecting the heater's sleek appearance. The switch also allows for the heater to be turned on remotely.

INNOVATIVE TECHNOLOGY

- Heater output options:
9 kW, 10.5 kW, 12 kW, 15 kW
- The external parts are black-painted steel
- The internal parts are made from stainless steel
- Easy to maintain – the heating elements are separated from the stone space
- Triple-wall technology
- Optional:
 - Integrated safety switch
 - Fastening kit for heater railing
 - Wooden railing

With this heater, we recommend the elegant and easy-to-use Just Sauna Fin control unit (p. 26)

Technical data, p. 43

Concept R combi

FOR PEOPLE WHO ENJOY A MELLOW SAUNA BATH

Sentio by Harvia's Concept R Combi steam heater combines advanced sauna technology and design. The Combi heaters are equipped with steamers for an effortless and ever smoother sauna experience. The heater has a separate fragrance grate for delightful sauna fragrances.

Sentio by Harvia's Concept R Combi represents the highest level of design and technology. The smooth design of Concept R Combi makes it easy to include this heater as part of any modern sauna room. Painted black and stylish from top to bottom, Concept R Combi can also be placed at the centre of the bench solution. As a finishing touch, a safety railing that fits seamlessly around the sauna heater has been created for Concept R Combi. The light-coloured safety railing adds an element of softness to the otherwise robust heater.

Highly advanced, top-level technology enables quick heating and a long lifespan of the product. The stones and the heating elements are in their own separate compartments.

An integrated safety switch is available for the Concept R Combi steam heater, allowing the user to turn the heater on remotely.

PRAGMATIC HEATER DESIGN

- Heater output options: 9 kW, 10.5 kW
- The external parts are black-painted steel
- The internal parts are made from stainless steel
- Easy to maintain – the heating elements are separated from the stone space
- Triple-wall technology
- Adjustable legs
- Optional:
 - Integrated safety switch
 - Fastening kit for heater railing
 - Wooden railing

With this heater, we recommend the elegant and easy-to-use Just Sauna Combi control unit (p. 27)

Technical data, p. 45

Concept R mini

ADAPTABLE HEATER DESIGN

The latest sauna technology has been applied in the design of the Concept R Mini heaters. Features that increase safety, such as a design railing, make the heaters perfect for small saunas. The wooden railing also adds an element of softness to the otherwise steely black design.

The Concept R Mini is designed to provide a sustainable sauna bathing experience. This heart of the sauna room has an extensive lifespan, thanks to its internal parts that are made from stainless steel. Effortless maintenance has been factored in the heater's design, making both the installation and maintenance smooth to perform.

TOP-LEVEL DESIGN AND TECHNOLOGY

- Heater output: 3.5 kW, 4.5 kW, 6 kW and 7.5 kW
- The external wall has been painted black and the front is made from brushed steel
- The internal parts are made from stainless steel
- Easy to maintain – the heating elements are separated from the stone space
- The leg allows for the stalled on the floor
- The bottom plate collects all the stone chips and excess water
- Optional:
 - The Floor stand allows for the heater to be installed on the floor
 - Fastening kit for heater railing
 - Wooden railing

With this heater, we recommend the elegant and easy-to-use Just Sauna control unit (p. 26)

Concept R mini combi

GENTLE HEAT FOR SMALL SAUNAS

The Concept R Mini Combi is suitable for those who enjoy a humid sauna bath. Combi heaters contain an integrated steamer. This steamer creates a smoother heat that you can enjoy for longer. A Combi heater is the perfect choice for anyone who likes sauna fragrances. Concept R Mini Combi is equipped with a separate fragrance grate, where you can place herbs or scented sachets, for example. Traditional sauna fragrances and sauna crystals will also add to the cosy atmosphere.

Concept R Mini Combi is designed to provide an effortless sauna bathing experience, sustainably. The stainless steel parts inside the heater guarantee that the heart of your sauna room has a long lifespan. Effortless maintenance has been factored in the heater's design – both the installation and maintenance will be smooth.

FOR PEOPLE WHO ENJOY A MELLOW SAUNA BATH

- Heater output: 6 kW and 7.5 kW
- A steam heater
- The external wall has been painted black, and the front is made from brushed steel
- The internal parts are made from stainless steel
- Easy to maintain – the heating elements are separated from the stone space
- Quick and easy to mount on a wall
- The bottom plate collects all the stone chips and excess water
- Optional:
 - The Floor stand allows for the heater to be installed on the floor
 - Fastening kit for heater railing
 - Wooden railing

With this heater, we recommend the elegant and easy-to-use Just Sauna Combi control unit (p. 27)

Technical data, p. 47

ELECTRIC SAUNA HEATERS

SENTIO BY HARVIA

Auxiliary evaporator R

PERFECT COMPLIMENT TO CONCEPT R

The auxiliary evaporator R makes steam for your sauna, whether as a stand-alone device or as an expansion module in combination with the oven series Concept R.

The auxiliary evaporator R can be easily retrofitted in existing sauna cabins with infusion stoves.

A sophisticated product design using quality materials such as porcelain and stainless steel characterises the auxiliary evaporator R. Under the porcelain dish for fragrance oils and herbs is an evaporator power of 2.5 kW, ensuring an optimum feel-good climate in your spa cabin.

INNOVATIVE TECHNOLOGY:

- Evaporator capacity: 2.5 kW
- Can be combined with Finnish sauna heaters
- Wall mounting and mounting on the sauna heater Concept R possible
- Exterior parts in brushed and powder-coated stainless steel
- Dishwasher-suitable ceramic covering shell
- Optional:
 - Fastening kit for heater railing
 - Wooden Railing (nut and linden)
 - Fixed water connection

ELECTRIC SAUNA HEATERS

SENTIO BY HARVIA

Qube

FOR DEMANDING INTERIOR DESIGNERS

Sentio by Harvia's Qube will not let even the most demanding of sauna decorators down. The sauna heater's straight contours, dark colour and robust, stainless steel flange will catch your eye. The carefully selected materials and innovative heating element structure make Qube an excellent and reliable choice for spas, hotels and large family saunas.

Sentio by Harvia provides sauna bathers with a relaxing, multisensory experience. The stone space of the stylish Qube sauna heater is surrounded by brushed steel, and the bottom is graphite black. Qube's appearance allows you to place it any way you wish in your sauna – all of the heater's sides can be left visible. As a finishing touch, we recommend a wooden handrail that goes around the heater. A wooden handrail will lighten the otherwise robust appearance of Qube and add safety to the sauna.

The design of Qube's elegant outer surface utilises triple-wall technology, thanks to which the temperature of the heater's outer wall remains low even while the heater is on.

Qube heaters are simple to maintain, because their stone space has been separated from the heating elements. The separate stone space allows for the heating elements to be maintained without the need to replace the stones. The structure also protects the heating elements from excess water and the weight of the stones, thereby extending the heating elements' lifespan. A detachable junction box makes the heater's installation and maintenance quick and easy.

STREAMLINED HEATER DESIGN

- Heater output: 9 kW, 10.5 kW, 12 kW and 15 kW
- The external parts are brushed steel that has been painted black
- The internal parts are made from stainless steel
- Easy to maintain - the heating elements are separated from the stone space
- Triple-wall technology
- Adjustable legs
- The bottom plate collects all the stone chips and excess water
- Optional:
 - Fastening kit for heater railing
 - Wooden railing

With this heater, we recommend the elegant and easy-to-use Just Sauna control unit (p. 26) and an additional power unit (O-S2-18).

Technical data, p. 49

ELECTRIC SAUNA HEATERS

SENTIO BY HARVIA

Qube 240

FOR PROFESSIONAL SAUNA BATHING

Sentio by Harvia's Qube is a sauna heater designed for professional, continuous use. It produces a mellow heat, charming you with its style and confidence-inspiring sturdiness. The carefully selected materials and innovative heating element structure make Qube an excellent and reliable choice for spas and hotels.

Sentio by Harvia provides sauna bathers with a relaxing, multisensory experience. The stone space of the stylish Qube sauna heater is surrounded by brushed steel, and the bottom is graphite black. All sides of the Qube heater can be left visible, allowing you to install it in your sauna any way you want. As a finishing touch, we recommend a wooden handrail that goes around the heater. A wooden handrail will lighten the otherwise robust appearance of the Qube heater and add safety to the sauna.

The design of Sentio by Harvia's products utilises the latest sauna innovations in order to provide the best bathing experience. The elegant outer surface uses triple-wall technology, thanks to which the temperature of the heater's outer wall remains low even while the heater is on.

ADDING STYLE TO PROFESSIONAL SAUNAS

- Heater output: 18 kW, 21 kW, 24 kW
- The external parts are brushed steel that has been painted black
- The internal parts are made from stainless steel
- Easy to maintain - the heating elements are separated from the stone space
- Triple-wall technology
- Adjustable legs
- The bottom plate collects all the stone chips and excess water
- Optional:
 - Safety railing

With this heater we recommend the Pro B2 control unit (p. 28), suitable for demanding use, and an additional power unit (O-S2-30).

Technical data, p. 52

Carefree relaxation

Sentio by Harvia's advanced heat sources and internationally award-winning design is complemented by a range of accessories designed for bathers. Thanks to the streamlined and practical safety equipment, bathers can achieve complete relaxation. Close your eyes and let your senses enjoy the smoothness of the heat and vapours.

Control units

DOMESTIC AND PROFESSIONAL SAUNA CONTROLS

Creating the perfect moment

Sentio by Harvia's control units make your sauna bathing moments perfect. The humidity and temperature will follow your commands to the letter. You can create a mood lighting with the merest touch. With a timer, your sauna will be ready for bathing when you are. A control unit will provide you with advanced comfort of use, allowing you to fully relax. Smart technology, designed for you.

Just Sauna Fin

FOR A PERFECT SAUNA BATHING EXPERIENCE

The Sentio by Harvia Just Sauna Fin control unit has an elegant glass touch panel. The panel can be used to control the sauna heater and a hybrid sauna's infrared radiators.

Sentio by Harvia's Just Sauna Fin is an elegant and easy-to-use control panel of minimalist design. The LED lights let you monitor and adjust the temperature easily. The combination of heat, humidity and the tender power of infrared waves creates an enchanting sauna experience. Just Sauna is perfect for controlling a hybrid sauna.

TOP-LEVEL DESIGN

- Can be placed in any dry area
- An easy-to-use and modern control unit for sauna heaters
- The black glass touch panel can be installed in a central location
- Control for a maximum of 10.5 kW electric sauna heaters
- Connection for an additional power unit (required for sauna heaters exceeding 10.5 kW)
- Infrared radiator control (3.5 kW or with a max 500 W dimmer)
- Sauna lighting with a dimmer
- Power control for sauna fan

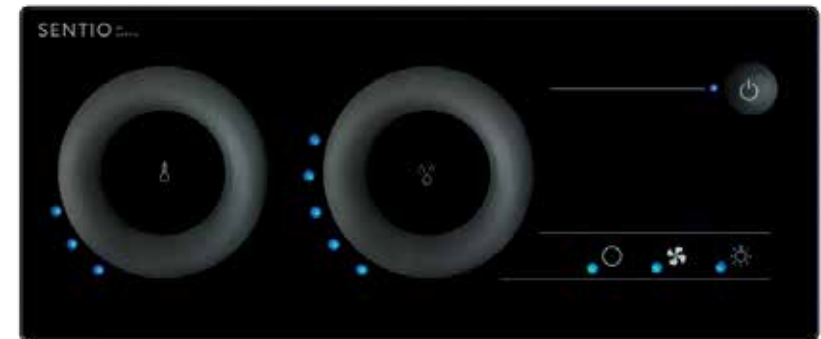

Just Sauna combi

FOR MELLOW BATHING MOMENTS

Sentio by Harvia's Just Sauna Combi control unit includes an elegant glass touch panel, which can be used to control a steam heater and a hybrid sauna's infrared radiators.

The minimalist Sentio by Harvia Sauna Combi control panel is stylish and simple. Thanks to the LED lights, the temperature and humidity are easy to monitor.

The combination and effortless utilisation of heat, appropriate humidity level and the tender power of infrared waves creates an enchanting sauna experience. Just Sauna Combi is perfect for controlling a hybrid sauna.

THE MOST PLEASANT USER EXPERIENCE

- An easy-to-use and modern control unit for a sauna heater with a steamer
- The black glass touch panel can be installed in a central location
- Control for a maximum of 10.5 kW electric sauna heaters
- Infrared radiator control (3.5 kW or with a max 500 W dimmer)
- Sauna lighting with a dimmer
- Power control for sauna fan

Professional B

FOR PROFESSIONAL SAUNA BATHING EXPERIENCES

Sentio by Harvia's Professional control unit is particularly useful for sauna experience professionals in spas and hotels. Controlling the sauna room is easy, particularly if the control unit is connected to the web via a Sentio by Harvia Pronet control device.

Control units designed for professional use have high requirements. Sentio by Harvia has responded to the challenge with its diverse range of Professional control units, designed for the most demanding locations. Only high-quality and long-lasting components have been used in the units.

The Professional control units provide an enjoyable user experience and a clear selection display. Diverse features, a reliable control unit and a timer guarantee a safe sauna experience.

The Professional B control unit has been designed for professional use, and thanks to its additional power unit it is suitable for controlling high-output electric sauna heaters. In addition, the control unit can be used to control the lighting and ventilation in the sauna room as well.

A CLEAR DISPLAY FOR CONTROLLING A TRADITIONAL SAUNA

- Extremely easy to use
- Digital temperature display
- Digital humidity display (PRO-B3)
- Electric sauna heater control (max 10.5 kW)
- Connection for an additional power unit (required for sauna heaters exceeding 10.5 kW)
- Steamer control (max 3.5 kW)
- Lighting and ventilation control (max 100 W)
- Can be remotely switched on
- Can be remotely controlled (Sentio by Harvia Pronet/RS485)
- Connection for an electric heater's safety device
- Timing operation
- On-time control

Professional B2

For controlling a sauna heater, lighting and ventilation

Professional B3 Combi

For controlling a sauna heater, a Combi heater, lighting and ventilation

Professional C

FOR A NEW TYPE OF SAUNA EXPERIENCE

The combination of an electric sauna heater and infrared radiators enables a completely new type of sauna bathing experience. With a Sentio by Harvia Professional C control unit, controlling the sauna is simple and pleasant.

The Professional control units provide an enjoyable user experience and a clear selection display. Thanks to the unit's diverse range of features, you can safely heat up your sauna for bathing. The Professional C control unit has been designed for professional use, and its additional power unit makes it suitable for controlling high-output electric sauna heaters. In addition, the control unit can be used to control the lighting and ventilation in the sauna room as well. Sentio by Harvia Pronet allows you to control the unit remotely.

The combination of heat and the tender power of infrared waves creates the most enchanting sauna experience. Professional C is also well suited for controlling the infrared radiators of a hybrid sauna.

A CLEAR DISPLAY FOR CONTROLLING A HYBRID SAUNA

- Simple user interface
- Save option for user profiles
- Digital temperature display
- Digital humidity display (PRO-C3)
- Electric sauna heater control (max 10.5 kW)
- Connection for an additional power unit (required for sauna heaters exceeding 10.5 kW)
- Vaporiser control (max 3.5 kW)
- Lighting and ventilation control with a dimmer
- Infrared radiator control (with 3.5 kW or max 500 W)
- Can be remotely switched on
- Can be remotely controlled (Sentio by Harvia Pronet/RS485)
- Connection for an electric heater's safety device
- Timing operation and on-time control

Professional C2
for controlling a sauna heater, lighting,
ventilation and infrared radiators

Professional C3
for controlling a sauna heater, Combi heater,
ventilation, lighting and infrared radiators

Pronet

FOR CONTROLLING A SMART SAUNA

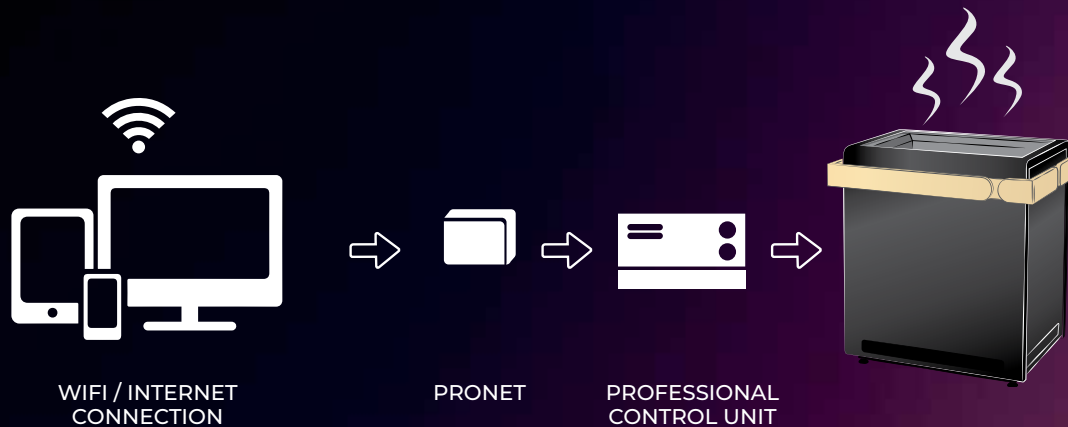

Sentio by Harvia will allow you to place your sauna control unit wherever you want. An advanced application, accessible via a browser, brings all the control functions to your smartphone, tablet or computer. A modern sauna bathing experience can begin anywhere.

Connect Sentio by Harvia Pronet to your home network and enjoy the comfort of remote control. In addition to turning on the heater in your sauna, you can use the application to control the temperature, humidity, infrared radiators and lighting in the hot room.

Pronet is compatible with Sentio by Harvia's high-quality Professional control units.

PRONET TURNS A SMART DEVICE INTO A SAUNA CONTROL UNIT

Pronet is connected to the home network and the Professional control unit, equipped with a safety switch. The browser application enables you to be in perfect control of your sauna.

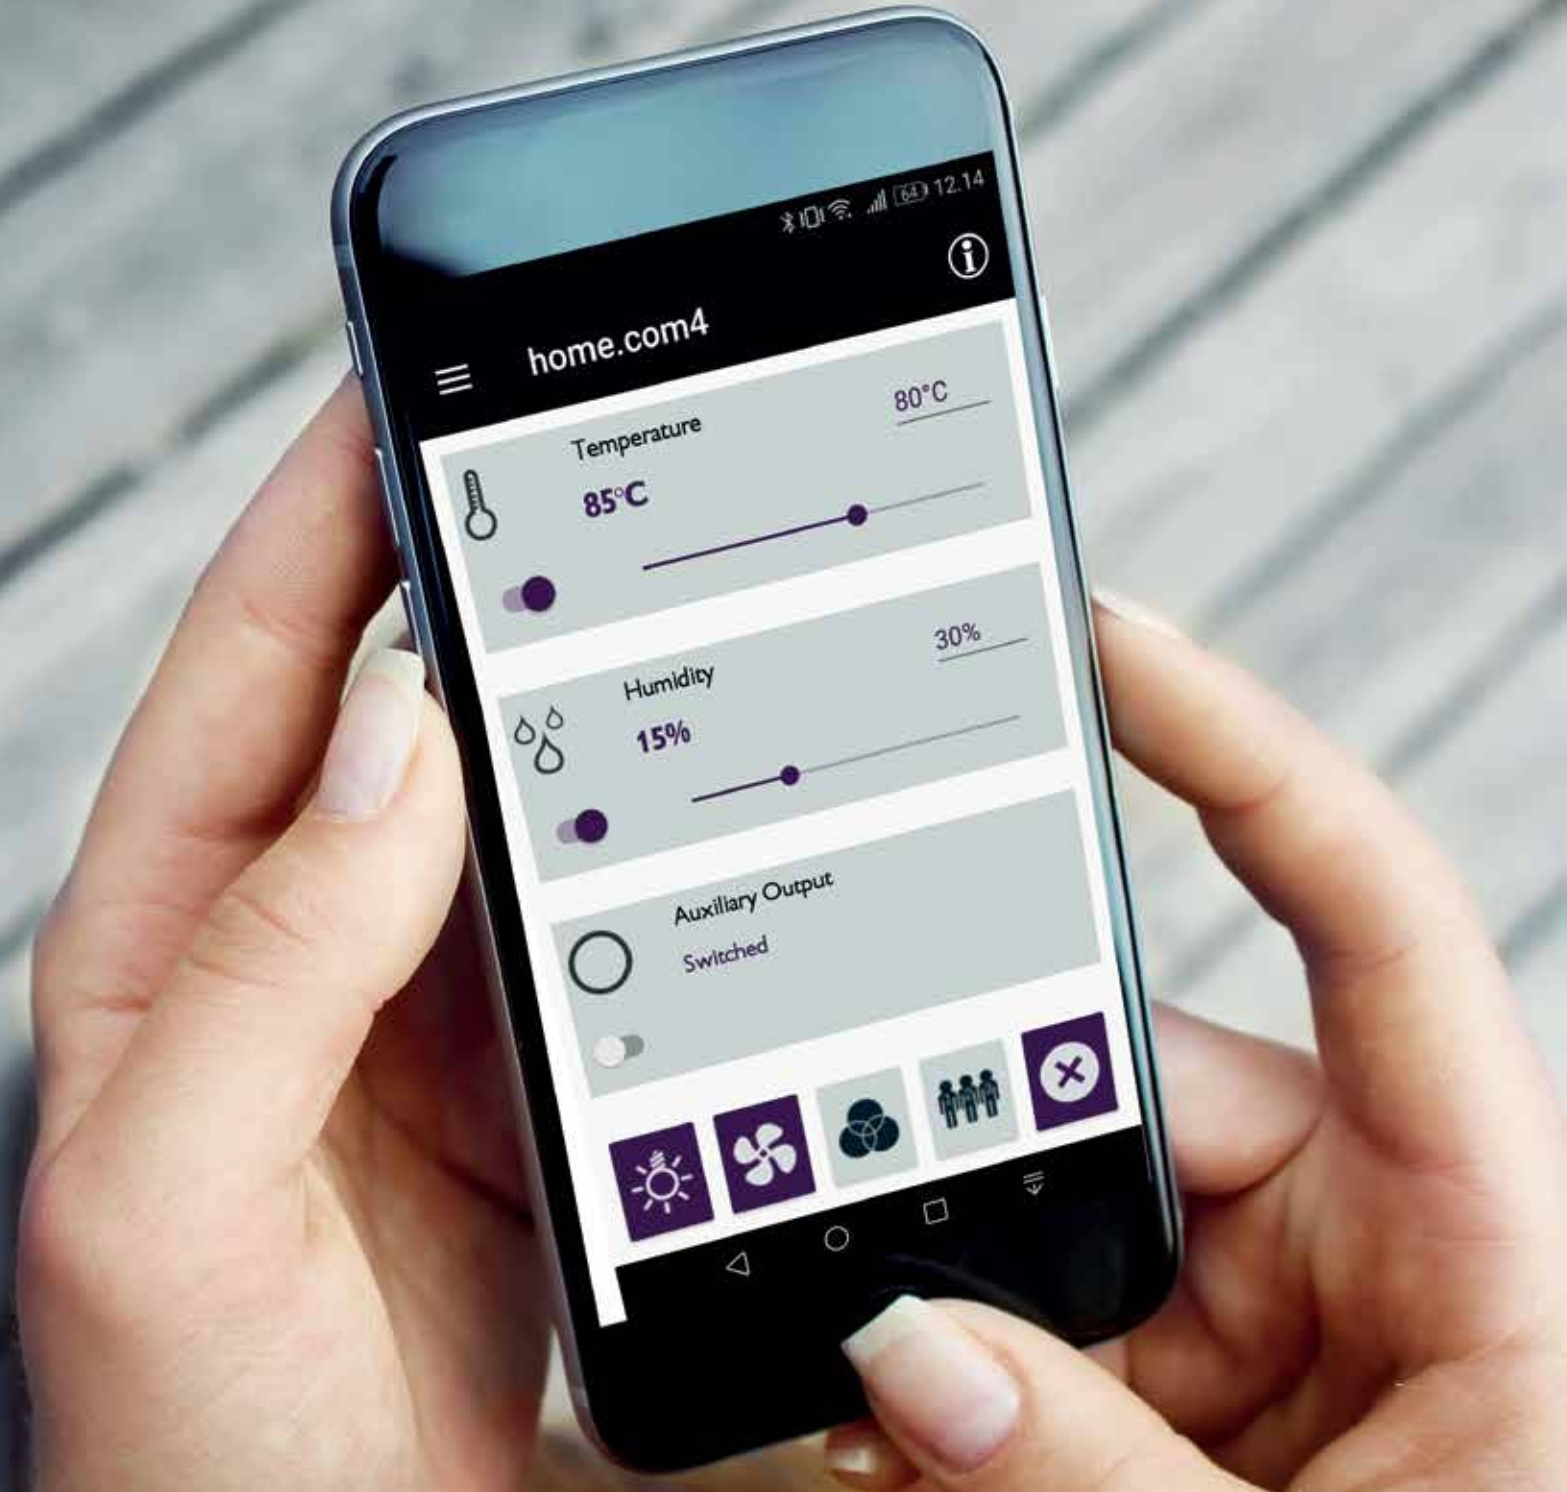

A functional package: A Sentio by Harvia Professional control unit, Pronet, an internet connection and a WLAN router. You can test the application at http://pronet.sentiotec.com/webapp_demo/#home

CONTROL YOUR SAUNA VIA WIFI

- Compatible control units: Sentio by Harvia Professional control units (PRO-B2, PRO-B3, PRO-C2 and PRO-C3)
- Easy control on mobile devices or a web browser
- Sauna room temperature control
- Sauna room air humidity control (PRO-B3 and PRO-C3)
- Sauna room infrared radiator control (PRO-C2 and PRO-C3)
- Lighting and ventilation control
- Safe to use
- Required accessories: Safety switch

Home.com4

NEW GENERATION SAUNA TECHNOLOGY

Sentio by Harvia's Home.com4 is a control unit that utilises Bluetooth technology and allows the users to control the sauna functions with their mobile devices. Home.com4 can be used to control any type of sauna: a traditional or an infrared one, or a combination of these known as a hybrid sauna. You can also control the lights and soundscape in your sauna world.

Home.com4 provides a simple solution for controlling the sauna experience. You can also access the functions with an elegantly designed control panel, integrated to the unit. The option pickers both on the control panel and in the application are clear. Home.com4 is an ideal solution for family and public saunas. A safety code will make the solution safe to use.

HOME.COM4 TURNS YOUR SMART DEVICE INTO A SAUNA CONTROL PANEL

- Simple Bluetooth control with a mobile device
- The mobile device software can be downloaded to compatible devices. The software also includes a demo version (available for download at AppStore and Google Play)
- All sauna control features in one device
- Control for a maximum of 10.5 kW electric sauna heaters
- Connection for an additional power unit (required for sauna heaters exceeding 10.5 kW)
- Infrared radiator control (3.5 kW or with a max 500 W dimmer)
- Vaporiser control (max 3.5 kW)
- Separate lighting control (max 4 DMX-controlled RGBW colour light groups)
- Lighting control (max 100 W)
- Fan control (max 100 W)
- Loudspeaker connection for sound (Bluetooth)

HEATER

INFRARED RADIATOR

Infrared radiators

POWER FROM THE WARMTH

The Sentio by Harvia Infrared heaters produce warmth that feels like gentle summer sunshine. You can adjust the temperature to your liking to an accuracy of one degree Celsius. Sentio's innovative infrared technology and top design create a luxurious way for you to become relaxed, clean and energised amidst the hustle and bustle of everyday life. At home. In a spa. At the gym. Discover the perfect harmony between body and mind.

Sentio by Harvia's revolutionary infrared radiators suit the style of any sauna design. Elegant black glass. Sentio by Harvia's infrared radiators can also be used in a modern hybrid sauna.

Feel the positive energy and power of the heat in Sentio by Harvia's infrared sauna. Sentio by Harvia's infrared radiators are a combination of innovative technology and charming, high-quality design. The soothing infrared sauna provides warmth for both body and mind.

Sentio by Harvia's infrared radiators are an excellent choice for all infrared saunas. Even decorators with the most demanding of tastes will appreciate the stainless steel frame that gives a finishing touch to the radiator's installation. The caressing power of the infrared is most effective when focused on the spine area. We recommend that you choose the backrest that best suits the design of your infrared sauna from our extensive selection for those relaxing sauna experiences.

Infrabox

INNOT AVAILABLELEVATIVE CONTROL

Sentio by Harvia Infrabox is a diverse new-generation digital control unit for infrared saunas and their infrared radiators. The elegantly small, unobtrusive and simple control panel is easy to install wherever you wish to use it.

The control panel's LED lights make it effortless and safe to control your infrared sauna.

Sentio by Harvia's Infrabox lets you enjoy the benefits of infrared radiation in your home spa with ease. The infrared sauna is controlled with the Infrabox control unit. The unit's innovative design is especially useful if you want to place an unnoticeable control panel in your sauna.

Sentio by Harvia's sophisticated Infrabox control unit allows you to enjoy your infrared sauna moments with all of your senses. The control unit lets you determine your infrared sauna's on-time and the intensity of its soothing warmth, as well as the lighting.

FOR CONTROLLING THE MELLOW INFRARED

- Control unit for infrared radiators
- 5-step radiator power control (max 1,300 W)
- Finding a suitable place for the small and unobtrusive control panel is easy
- The radiators' On/Off control, max 3,500 W
- Lighting control with a dimmer, max 100 W
- On-time control, max 6 h

Technical data, p. 55

HYBRID SAUNA

SENTIO BY HARVIA

Hybrid sauna

COMBINE THE TRADITIONAL SAUNA BATH WITH THE SOOTHING HEAT OF THE INFRARED

Enjoy a Sentio by Harvia sauna experience in a modern hybrid sauna, where the humid heat from a traditional sauna heater is combined with the smooth warmth of infrared.

Take your senses to a new level and enjoy the diverse nature and comfort of use of a hybrid sauna. The steadily rising vapours from a Combi heater equipped with a steamer add a bit of luxury to your sauna bathing experience. Simultaneously, you can relax while the infrared brings soft warmth deep into your muscles. You can use the sauna heater and infrared radiators together or separately, depending on your own preferences.

A relaxing sauna experience can also be complemented with pleasant colour lights, some music that fits the mood and sauna fragrances. Furthermore, you can control all this with Sentio by Harvia's control unit – even remotely on your device.

For a hybrid sauna, you will need a traditional sauna heater, a set of infrared radiators and a control unit, such as Sentio by Harvia Pro B3 or Home.com4, to control both equipment. Feel free to ask for more information from our experts.

SAUNA ATMOSPHERE

SENTIO BY PARVIA

Sauna atmosphere

THE SYMPHONY OF SENSES

A Sentio by Harvia sauna atmosphere is created through the seamless synergy of a state of the art sound system and sauna fragrances. Sound complements space. Would you prefer sound or silence? Perhaps some calming music? What about scents: Sweet or crisp? The choice is yours – compose your own symphony of senses

Sentio by Harvia's Vibro acoustic speakers create fantastic musical soundscapes in your sauna room. The speakers utilise the sauna room's structures to play the music. The musical experience is captivating and will enrich your sauna experience.

The Vibro acoustic speakers will meet the requirements of even the most demanding sauna designers. The sauna will not lose its elegance, because the loudspeakers are small and unobtrusive. These surface-installed loudspeakers are typically placed underneath the benches, which allows for the sauna room's beautiful wall panels to remain intact and retain their finished look.

The gentle fragrances of Sentio by Harvia's wellness set adds a finishing touch for an enjoyable sauna bathing experience. A relaxing sauna experience soothes the body and mind. This includes the mellow heat, elegant decoration and tranquil music. Charming fragrances complete the atmosphere.

Sauna fragrances

With Sentio by Harvia's sauna fragrances, you can create the atmosphere you seek. Would you prefer a refreshing and energising atmosphere, or relaxation with your favourite fragrance? Perhaps you wish to use sauna fragrances to create a balanced and calming environment? Sentio by Harvia's selection offers fragrances for various themes: Relax – Balance – Energy.

Sentio by Harvia's fragrances are mixed in with water and thrown onto the hot sauna stones, forming vapours of wonderful aromas for the bathers to enjoy. Each fragrance has its own unique characteristics. Discover your favourite.

Sauna crystals

Sentio by Harvia's delightfully refreshing sauna crystals create a magnificent atmosphere in the hot room. Even a single piece of a crystal placed straight on top of the sauna stones will result in a pleasantly invigorating scent.

For sauna decoration

THE PERFECT PLEASURE OF BEING

Sentio by Harvia takes sauna experiences to a whole new level. The caressing effect of an infrared sauna is most effective when the infrared radiation is focused on the spine area. Inspired by the relaxing warmth, Sentio by Harvia wants to provide its customers ergonomically designed backrests, which will make your sauna bathing experience even more pleasurable. Suitable fragrances, beautiful lighting and relaxing music will be the cherry on top of a sauna session, stimulating all of your senses.

The ergonomic Wave headrest
for ultimate relaxation in a sauna
515-A (aspen)

Ergonomic backrest (two parts)
RL-IR-E, linden, 71.5 x 11 x 8 cm
RL-IR-L-L, linden, 84.5 x 11 x 8 cm

35 x 89 cm
514-L, linden
514-A, aspen

FOR MAGNIFICENTLY MELLOW SAUNA BATHS

Sentio by Harvia's round shape sauna stones are made to finish the design look of your sauna heater. Our sauna stones are made from natural stone and, compared to traditional rough-cut stones, provide a wonderfully soft sauna bath experience.

Round sauna stones
