

INSTALLATION MANUAL „Forest door”

Check the product before the installation!
It is not allowed to install faulty or damaged goods.

- If you have to store the door in it's carton packaging, store it horizontally
- Do not store the door in contact with water or constant moisture
- Do not use the door for outside use or wet room door
- In standard the door is not varnished or painted

- **All the wooden details must be treated with protection liquid to avoid the construction damages caused by moisture.**

- Fixing screws for door frame are not included with package

INSTALLATION OF THE DOOR

Installation requires two person.
Please wear the eye protection and protective gloves during the installation.

1. Take the door out of the package
2. Remove the door panel from door frame (lift up the door panel)
3. Remove the lower frame detail (it is only for transportation)
4. If necessary, change the door opening direction by replacing the hinges (hinges for LEFT opening are included)
5. Place the door frame into the doorway
6. Using spirit level make sure that door frame is placed correctly
7. Fix the door frame with screws and/or installation foam
8. Place the door panel on hinges
9. Install the door handle (there are markings for screws)

MAINTENANCHE OF THE DOOR

Check fastenings and make sure that door moves correctly. If necessary regulate the hinges and tighten the hinge screws.

For making the door move easily, regulate the roller-lock when needed.
